THE MOMENTUM OF BUSINESS

Ready for capital, contracts and certification.

Lenders, procurement offices and corporate buyers never meet the founder. They read the file. Zytrion Infrastructure Group measures governance readiness, shows each owner what to correct first, and provides the tools to correct it, so the file can speak for the business.

WHAT INSTITUTIONS READ

Every decision about a business follows three flows.

Decision Flow

Who holds authority to decide, sign and spend, and where that authority is written down.

Money Flow

Business funds kept separate, with a documented basis for every movement of money.

Responsibility Flow

Every recurring duty with a named owner, a clear expectation and a record that it was done.

THE ZYTRION STANDARD

Five pillars of governance readiness

1 **Authority Clarity**
Who can decide, sign and spend, and where that authority is documented.

2 **Responsibility Ownership**
Every recurring duty has a named owner, a clear expectation and an established standard.

3 **Money Containment**
Business funds remain separate, and every movement of money has a documented basis.

4 **Evidence Integrity**
Filings, names, ownership and records are accurate and consistent with one another.

5 **Governance Discipline**
Practices run on a schedule, with review and follow-through, not memory.

THE GRID DIAGNOSTIC

Four tiers, one clear next step

The GRID Diagnostic measures a business across all five pillars in about fifteen minutes. Each owner receives a score, a tier and the weakest pillar to strengthen first.

TIER 1	**Governed**	Institution-ready
TIER 2	**Growing**	Structure in place, applied inconsistently
TIER 3	**Operational but Exposed**	Running, with gaps a reviewer will find
TIER 4	**Unstable**	High exposure, foundations first

Every tier comes with a defined path forward. Individual results remain private to the business.

WHAT ZYTRION DELIVERS

One governance operating system, from first score to certification

MEASURE

GRID Diagnostic

A 40-statement diagnostic across the five pillars, with a score, a tier and a first step.

LEARN

Enterprise in Motion Manual

The Three Flows, the Five Pillars and the D.E.D. Method (Decide, Execute, Document) in one manual.

BUILD

Tier Kits

Guided governance document sets matched to each tier, so owners build records an institution can review.

GROW TOGETHER

GRID Readiness Workshops

Facilitated cohorts with a follow-up session and a GRID retake to measure progress.

PROVE

Zytrion Standard Certification

Evidence-reviewed certification against one published rubric, verifiable by anyone.

SIGN

ZySign

Signing built into the Zytrion portal, so governance documents are executed and kept in one place.

WHO ZYTRION SERVES

Founders and owners

Preparing for a loan, a certification, a first contract or a bid, and ready to see the file the way a reviewer will.

Partners and programs

Chambers, business councils, incubators and economic development offices that want readiness they can measure.

Corporate and institutional buyers

Supplier development and supplier diversity teams that need suppliers ready for onboarding, security review and audit.

FOR PARTNERS AND CORPORATE MEMBERS

A readiness cohort your members can measure

Chambers, business councils, incubators and corporate supplier programs host a GRID Readiness cohort. Zytrion delivers it, follows up, and reports what changed.

01	02	03	04
GRID in the room Each participant learns the weakest pillar.	**Workshop and kit** One record committed to fix.	**Follow-up** The committed fix, checked.	**Retake at day 180** Movement, measured.

- A dedicated partner link that shows participation
- A de-identified summary of where gaps concentrate, with each participant's consent
- Supplier readiness before onboarding, security review and audit

OUR COMMITMENTS

Credibility requires more than a promise

- **Scores cannot be bought.** A purchase never changes a score, a tier or the order of findings.
- **Certification is earned through evidence,** sustained over a defined look-back period.
- **Reviewers remain independent.** They disclose conflicts, and the founder never certifies a business in which she holds a stake.
- **Results stay private.** Any research is released only in aggregate.

LEADERSHIP

LaVonne L. Norrils, Founder and CEO, brings thirty years of technology process governance, beginning at MCI WorldCom in 1996, across national network buildouts, a banking procure-to-pay center of excellence and enterprise SAP transformations.

Know where your business stands.
